SUPER STRATAFLEX

Weather resistance film suitable for exterior use

Surface is laminated by special film with ultraviolet absorption agent.

Weather Resistance

Special film layer with ultraviolet absorption agent will prevent deterioration of printed layer from sunlight. About 5 years weather resistant capabilities for exterior vertical surface application.

*No significant change was seen after 5000 hours of lighting. (Conform to Sunshine Caroon Arc Lighting Test)

Stain • Chemical Resistance

Special film layer contains fluorine guard against oils and chemicals.

ANTI-BACTERIAL • ANTI-MOULD

Great for use in bathrooms and areas with high water use or humidity

Surface is laminated by special film with anti-bacterial and anti-mould agent

These selected designs are most suitable for renovation of areas with high water usage such as modular bath, toilet, etc.

COLOUR series of STRATAFLEX on pages 50-51 are also ANTI-BACTERIAL • ANTI-MOULD (excluding POP COLOURS)

MIRACLEAN

Superior performance film with great stain resistance and sterilization

PTFE* coating on top layer

*Polytetrafluoroethylene

Extra Stain Resistance

Oil stains, graffiti, hair dye agents are easily removed with damp cloth. Also effective to prevent adhesion of nicotine.

Bacterial Resistance

Easy to wipe off invisible bacterias such as O-157. Also performs excellent chemical resistance.

() for more technical data, please refer to page 60 of the book.

Economic

Easy maintenance makes longer duration of remodeling and cuts your budget.

MIRACLEAN's Special Top Layer

The top layer of MIRACLEAN is PTFE (polytetrafluoroethylene) resin film. It has extremely strong cohesion and stability, its molecules being difficult to bond with others. For this characteristics this special film can resist water, oil and stains. It is also strong against chemicals. PTFE is commonly used on non-stick pans.

SUPER GLOSS COAT GLOSS / FLAT

Superior protection against minor scratches and abrasion

Special coating on top layer

SUPER GLOSS COAT restores the finish of damaged areas

Minor scratches and abrasions are reduced or eliminated by the application of SUPER GLOSS COAT.

2 Distinct surface finishes - Gloss and Flat

The application of SUPER GLOSS COAT creates a beautiful, long lasting surface finish and is available in both a highly polished gloss or a rich satin flat.

*SUPER GLOSS COAT cannot repair major damages, such as deep scratches, tears and abuse.

STRATAFLEX WIPEBOARD FILM

STRATAFLEX Wipeboard transforms most interior surfaces into writable and projectable communication surfaces

TW-1000

Convenient to Use

Easy to write on, highly legible and easy to clean using all standard Dry-erase markers and accessories.

Projected Image are Bright and Sharp

The special surface finish of STRATAFLEX Wipeboard offers a smooth, consistent image when projected upon, improving image sharpness and reducing eye fatigue.

Highly Comfortable Finish

STRATAFLEX Wipeboard is comfortable to corners, allowing for unusual applications around columns or bulkheads.

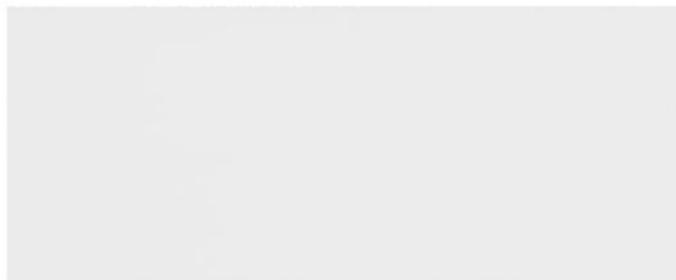

Available in 3 Distinct Finishes

STRATAFLEX Wipeboard is available in two subtle tones in addition to our standard white finish.

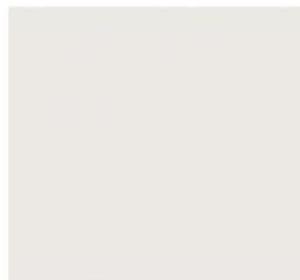

Projected Image Comparison

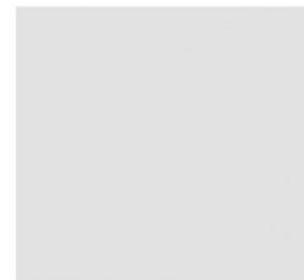

Low visible of the projected image

DOOR COLLECTION

Specialized refinishing film for exterior door projects

Ultraviolet absorption film laminated on top

Extreme Durability in Exterior Environments

The film surface is coated with a high protective, durable UV protection film, preventing deterioration of the STRATAFLEX printed layers by sunlight and weather exposure. This laminated film provides approximately 5 years of protection from the effects of weathering, depending on location and exposure. Results may vary. Consult your authorized STRATAFLEX Dealer/Installer prior to installation.

Intended Application

DOOR COLLECTION is a revolutionary new product, engineered as a thicker, more durable version of traditional STRATAFLEX that is specifically intended for the demands of the exterior environment and sized to allow refinishing of door faces with minimal waste and maximum efficiency.

Advantages of STRATAFLEX DOOR COLLECTION

DOOR COLLECTION is produced in a special, narrower 1,000 mm width intended specifically for the door refinishing market. This narrower size allows for less waste and efficient installation.

 CROSS REFERENCE

1. COMPOSITION & ROLL SIZE

- Composition : Poly Vinyl Chloride (PVC)
- Standard Roll Size : 1.22m x 50m (some designs are in 30 or 40m rolls).
Cut length is available on request.

2. LOWEST TEMPERATURE FOR INSTALLATION

12 °C

3. IDEAL TEMPERATURE FOR INSTALLATION

20 - 25 °C

4. STORAGE CONDITIONS

Store the product in good condition, below 38 °C, avoid direct sunlight and high humidity. Use within 1 year of purchase.

5. DIMENSION STABILITY TEST

[Test method] : 150 x 150mm of Strataflex was stuck on the centre of a 200 x 200mm aluminium panel. A cross cut was made in center. After 2 days at 65 °C, the maximum gap in the cut was measured.

[Test result] : Not greater than 0.3mm

6. THERMAL DURABILITY TEST

[Test method] : Strataflex was stuck on an aluminium panel. It was kept for 12 days and exposed to various temperatures.

[Test result] : No peeling or colour change occurred between - 30 °C to + 65 °C

7. SUNSHINE CARBON ARK LIGHT TEST

[Test method] : 250 hours lighting of sunshine, using Carbon Ark Light testing machine at 63 °C of black panel temperatures.

[Test result] : No change

8. ABRASION TEST

[Test method] : Final abrasion point by Taber testing machine (wheel : CS-17, 1kg weight)

[Test result] : Greater than 7000 cycles

9. HIGH TEMPERATURE DURABILITY TEST

[Test method] : Strataflex was stuck on an aluminium panel and kept for 28 days at 65 °C

[Test result] : No change in adhesion

10. HIGH HUMIDITY DURABILITY TEST

[Test method] : Strataflex was stuck on an aluminium panel and kept for 28 days at 40 °C RH 90%.

[Test result] : No change in adhesion

11. LOW TEMPERATURE SHOCK TEST

[Test method] : Du-Pont shock test (0 °C, 100g, 100mm, 1/2 inch diameter)

[Test result] : No change

12. TEST FOR ANTI-BACTERIAL

[Test result] :

	Items for test	Primal consistency	Consistency after 24 hours
Co on bacillus	TA-4702 to 4804	2.4×10 ⁵	<10
	All Other Strataflex		5.6×10 ⁴
Staphylococcus aureus	TA-4702 to 4804	4.5×10 ⁵	<10
	All Other Strataflex		1.8×10 ⁴
MRSA	TA-4702 to 4804	2.4×10 ⁵	<10
	All Other Strataflex		7.0×10 ³

* The Bacteria were cultivated on standard agar at 35 °C

* Tested by JFRL (Japan Food Research Laboratories)

13. TEST FOR ANTI-MOULD

[Test result] :

Grade				
Items for test	10 days later	14 days later	21 days later	28 days later
TA-4702 to 4804	0	0	0	0
Other products	2	2	3	3

*Grade : 0 - 4 (It shows the condition of mould's growth)
 0 : Not found
 1 : Under 10% of surface area
 2 : 10 - 30% of surface area
 3 : 31 - 60% of surface area
 4 : 61 - 100% of surface area

* Test method : ASTM-G21, at 28 °C ± 2 °C and over 95% RH

* Tested by Tokyo Metropolitan Industrial Technology Research Institute

14. SOLVENT / CHEMICAL RESISTANCE TEST

[Test method] : Chemicals were dropped on the surface of Strataflex and left for 6 hours. They were then washed off with water and left to dry 24 hours.

[Test result] :

	Strataflex Normal	Super Strataflex	Miraclean
Petroleum benzine	No change	No change	No change
Ethyl alcohol	No change	No change	No change
n-hexane	No change	No change	No change
Toluene	Slight change in gloss	No change	No change
Ethyl acetate	Slight change in gloss	No change	No change
Methylethylketone	Lifting	No change	No change
Ammonia	No change	No change	No change
Hydrochloric acid (10%)	No change	No change	No change
Caustic soda (10%)	No change	No change	No change

15. STAIN RESISTANCE TEST

[Test method] : The surface of Strataflex was wiped with neutral detergent / ethyl alcohol after 24 hours contact with the following materials.

[Test result]

	Strataflex Normal	Super Strataflex	Miraclean
Vinegar	Wiped off with neutral detergent	Wiped off with neutral detergent	Wiped off with dry cloth
Coffee	Wiped off with neutral detergent	Wiped off with neutral detergent	Wiped off with dry cloth
Ketchup	Wiped off with neutral detergent	Wiped off with neutral detergent	Wiped off with dry cloth
Soy sauce	Wiped off with neutral detergent	Wiped off with neutral detergent	Wiped off with dry cloth
Water based marker	Wiped off with neutral detergent	Wiped off with neutral detergent	Wiped off with dry cloth
Crayon	Wiped off with ethyl alcohol	Wiped off with ethyl alcohol	Wiped off with dry cloth
Hair dye	Slightly stained	Wiped off with ethyl alcohol	Wiped off with dry cloth
O ⁻ based marker	Slightly stained	Wiped off with ethyl alcohol	Wiped off with ethyl alcohol
Shoe polish (black)	Stained	Wiped off with ethyl alcohol	Wiped off with dry cloth

16. ∞PVC

Please note that under Japanese law, all PVC items must carry the ∞ PVC logo which is printed on the reverse of the Strataflex products.

This may become visible if adhered to translucent substrates.

Strataflex Hanging Information

GENERAL INSTALLATION INFORMATION

Strataflex self-adhesive laminate film is easy to install on non-absorbent, hard, smooth surfaces. We want everyone who uses Strataflex to be able to apply it successfully and therefore recommend that you follow the approved hanging instructions. For detailed hanging instructions contact Customer Services or visit www.muraspecmarine.com, and select 'technical'. Additionally, full Hanging Instructions are supplied with every order.

BEFORE YOU START :

The key to successfully installing Strataflex is good preparation of your working environment; solid, smooth working surfaces and having the right tools and equipment to hand for each type of job.

GENERAL PREPARATIONS :

- Check materials are as ordered and as specified and are free from damage.
- Ensure all material is from the same batch and that you have sufficient material to complete the work.
- We recommend that the floor adjacent to the work area is covered using a clean protective sheet and that the working environment is clean and dust free.
- Make sure that there is good lighting and good ventilation.
- The conditions must not be excessively hot or cold as this could affect the application process.
- Due to the nature of the design, some metallics under certain lighting conditions can display shading at the joints, which is a characteristic of the product.
- Care must be taken when applying and repositioning the product onto itself as contact with the adhesive and the face of certain designs may affect its appearance.

*Please be aware that different products within the Strataflex range have varying hanging instructions. Below are 3 areas of particular note.

*Care should be taken with the waxed release paper after use due to potential slipping hazard.

*Due to the nature of the manufacturing process and the characteristics of self-adhesive vinyls it is not possible to achieve an exact pattern match when any design is installed, however if care is taken during installation all designs we believe will give a very acceptable finish.

1. INSTALLATION FOR A CURVED SHAPE SURFACE

Strataflex can be applied on certain curved shape surfaces by using heat from hair dryer or heat gun with a low setting.

APPLICATION

- Apply heat to the area of Strataflex that is to be wrapped until it becomes flexible.
- Gently stretch the Strataflex onto the curved area, taking care not to focus the heat on the same area for too long as this could lead to over stretching.
- After covering the curved area with Strataflex, cut off the excess edges on the underside. To complete the application, you should then apply a strip of Strataflex to the underside, overlapping the cut edge. You should enhance the edge to be overlapped before fixing.

IMPORTANT NOTICE

- Some items are not suitable for curved shape surface application. Check the product details for each item before selection.
- Excess heat and stretching can cause colour change or unevenness on the surface.

2. INSTALLATION OF 'SUPER STRATAFLEX' FOR EXTERIOR USE

- Use a waterproof sealant to prevent water from penetrating. The recommended substrate is steel or similar finish.
- Do not apply onto a ceramic surface, as the long-term adhesion cannot be guaranteed.
- Apply directly on glass after cleaning. Do not apply on glass exposed to direct sunlight, as this may result in movement.

3. INSTALLATION OF 'MIRACLEAN'

- Take care not to scratch the surface with the edge of the spatula. Using a soft cloth around the spatula may help.
- In excessive wet room areas 'MIRACLEAN' is not suitable as PTFE coating does not enable the use of a waterproof silicone sealant.
- Not suitable for application on uneven surfaces such as tiles.

USING 'STRATAFLEX ADHESION ENHANCER'

'STRATAFLEX ADHESION ENHANCER' is designed to increase the bond strength in certain situations. Enhancer should be used where extra adhesion is required for such as: door edges; overlapped areas; filled areas and where heat is used to form a shape and where an open cut edge is to be left.

Strataflex Fire Certification & Approvals

Marine Certification

Marine resolution MSC61 (67) (1996)
IMO resolution A.653 (16) (1993)
Solas 1974 convention.

Bureau Veritas Approvals;
Certificate of Type approval;
No. 10496/D1 EC
Certificate of Quality System Approval;
No. SMS.MED2.D/26678/E.1
(as of June 2017)

U.S.C.G Approval number;
164.112/EC0062

Transport Canada T.C.398.E2.166

The Ministry of Land, Infrastructure and Transport
Government of Japan;
Approved

Class NK;
Approved

Land Certification

U.K.

Class O & 1 as defined in BS.476:
Part 6:1989 & BS.476: Part 7:1997.
Certificate No; 113128/113129

France

M1.BO 13105 Cemaf/1

U.S.A.

ASTM E 84-00
